一体锻打无焊接，避免焊接断裂风险

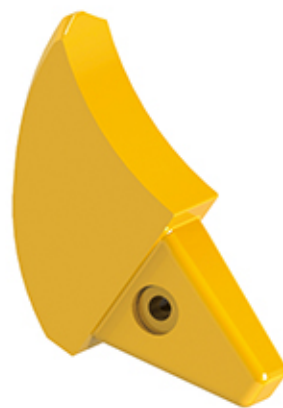

One-piece forging, without any welding to avoid the risk of welding breakage

头部3D立体冷加工成型，更贴合斗齿接触面

The adaptor is fully machined in 3D, achieving a more precise fit with the ripper teeth

头部限位设计，减小斗齿位移，抑制形变幅度
Reinforced adaptor box keeps ripper teeth movement to the minimum as well as suppressing deformation of adaptor

专为岩石臂松土器设计制造
Designed and manufactured specifically for rock arm ripper

履带筋

Grouser Bar

提供各种剪切长度
Provide full length or cut-to-length bar

可定制截面尺寸
Customizable cross-sectional dimensions

专业热处理工艺，高耐磨，使用寿命长
Professional heat treatment with high resistance and long wear life

锻造
Forging

率先采用锻打工艺，
避免铸造缺陷

Taking the lead in adopting
forging process to avoid
casting defects

一体成型技术，
消除分体焊接带来的断裂风险

Integrated forming technology,
eliminates breakage risks
associated with welding processes

纯正OEM设计，
精确契合标准配套件

Genuine OEM design,
perfectly matching original
and OEM parts

D475

D11

- 所有齿块全部锻打成型
Segments were forged to the shape
- 良好的热处理工艺
Excellent heat treatment process

刀角刀片 Cutting Edges & End Bits

- 提供各型推土机刀角刀片及各型平地机弧形刀角刀片
Full range of cutting edges and end bits for bulldozer and grader
- 提供具有良好可焊性的单坡口刀片及箭型刀片
Provide single bevel and arrow-type cutting edges that are easy to weld
